THE CHINESE IN MASSACHUSETTS. -The Crispins, that is the shoemakers, of North Adams and Massachusetts threaten general strike over the seventy-five Chinese taken to the Bay State. All of them are at work now, and show great aptitude for beginners, but the white people (Crispins, male and female,) are flerce against the new-comers. When they first arrived in North Adams, some days ago, stones were thrown and they were hooted at by the "liberty" lovers of that region. New England didn't hesitate to import Africans when she first wanted cheap labor, and so now she avails of Asiatics for the same purpose. They have their own foreman, receive \$23 a month, with lodging and fuel, and board themselves in their own fashion, their employer furnishing two Chinese

The city election held in Waterbury, Connecticut, on Monday last, resulted, in the words of the Waterbury American, (Radical,) "in a clean sweep for the Democrats in everything excepting the second ward." The American claims that this is not surprising, excepting as regards the third ward. "This ward," it says, "is known to be strongly Republican, but it went Democratic." The Democratic candidate for mayor, Isaac E. Newton, was elected by 193 majority. Waterbury last year elected a Radical mayor by 316 majority, but her citizens seem to prefer a return to Democratic

The Boston Post says when United States Senators, in session, so far lose self-respect as to denounce each other as liars, it is evidence of that lack of decency which is recognized as lack of sanse. The low manner of this body is an indication of its low moral tone, and hence the necessity of devoting so much time to the exposition of the corruption of its members. The Flanigans and Hamiltons, Yateses and Drakes, Chandlers and their fellows in the upper branch of Congress are only crude Sumners, Mortons, Howards, Hamlins, Shermans. Thoy are all of one breed, but different litters.

On Wednesday, as a railroad train approached Platte river, the engineer discovered a band of Indians, about 300, mounted, crossing the track. As the train neared the Indians, they began to yell. The engineer, supposing they were about to attack the train, put on the same footing as simple or definition for order. It was urged by a friend to tryit, and procured a bench of the leave of the stomach, which caused a constant rejection of food. The doctors at Westminister Hospital gave up my case in despair. GENTLEMEN: I have very great pleasure in recommending your medicine, the Pain Killer.
I was suffering severely a few weeks since with Bronchitis, and could scarcely swallow any food, so inflamed was my throat. I was advised by a friend to try your Pain Killer, and, after taking a few does of it, was completely cured. Yours respectfully.

cepers. More than 450,000 of these watches are now speaking for themselves in the pockets of the people-a proof and a guarantee of their superiority over all others.

accuracy of the Waltham Watch. To satisfy

that class in all these respects, is to decide

the question as to the real value of these time-

The superior organization and great extent of the Company's Works at Waltham, enable them to produce watches at a price which renders competiation futile, and those who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is

necessary. We are now selling Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watch-making originating in this country or in Europe, only those were finally adopted which severe testing, by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping. & Among the many improvements we would particularize:

The invention and use of a centre-pinion of peculiar construction, to prevent damage to the train by the breakage of main-springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's patent pinion as be ing the best and faultless.

Hardened and tempered hair springs, now TO accommodate the large VEGETABLE BUSINESS offering by this steam line to New York, the steamships are appointed to sail from Charleston as follows, arriving in New York on Friday morning:

Both the steamships on this line are newly constructed, the largest and most commodious on the Atlantic coast, built of iron, with water-tight compartments, and all passenger accommodations are on DECK, securing thorough ventilation and comfort.

Our new patent stem-winder, or keyloss watch, is already a decided success, and a great improvement on anystem-winding watch in the American market, and by far the cheapest watch of its quality now offered to the public. To those living in portions of the United States where watch-makers do not abound, watches with the above mentioned improvements which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every watch guaranteed by the Company.

It has been the custom to treat these diseases with Mercury and other Mineral substances, which, though sometimes producing a cure, often prove injurions, and entail misery in after life. The long known injurious properties of these so-called alteratives and purifiers has led the philanthropical man of science to explore the arena of nature, the result of which has been the discovery of vegetable products which posses the power of eradicating these taints from the Blood.
